

Source of information: International Commission on Missing Persons (ICMP)

Mass grave Carevo polje

According to the Physicians for Human Rights (PHR) report, 78 Bodies were recovered, 55 from pit One and 23 from pit Two.

The 78 were interred on a hill on the outskirts of the town in an orderly fashion in two very closely associated, unmarked graves. They were in body bags. Another three were buried individually within about 30 meters of one another on a farm around two kilometers from the town, and were buried without bags. Causes of death varied, but included gunshots and blunt force trauma.

The discovery and removal of the bodies at Carevo Polje was undertaken efficiently and successfully. Among the bodies recovered there were young and elderly civilians, female and male, as well as soldiers.

DNA statistics

Report category	Value
Total number of DNA reports	38
Number of DNA reports for different individuals	35
Number of reassociation DNA reports	3

Please note

Over the years, the exhumation process of victims in Bosnia and Herzegovina has involved various domestic institutions and international organizations, including the former Entity-level commissions for missing persons, the ICTY, OHR, PHR, and ICMP. The information presented here is compiled from ICMP's technical assistance in the field and in mortuary settings, combined with data available from other sources. For some excavations, ICMP was not in a position to obtain information.
